Introduction

Al Sajaa General Maintenance Contracting was established in the year 2000 by a dynamic visionary and entrepreneur . The period beyond 2000 saw surge in the construction and Maintenance activity across the emirates in the U.A.E. Companies offering specialized contracting works were scarce and there was a large gap between supply and demand creating a huge potential for companies specializing in such works to establish a niche market for themselves. The booming construction sector offered many opportunities for firms possessing technical expertise and execution capabilities, visualized and recognized this opportunity and set up the Company. Al Sajaa General Maintenance Contracting has achieved a track record of Excellence spanning multiple types of projects of different configurations and magnitudes. Specialized expertise and project management solutions for all types of infrastructure requirements. Al Sajaa General Maintenance Contracting prides itself on achieving remarkable results in the realm of rewarding career growth and the personal development of its employees with a wide scope of training, recreational and developmental activities spanning multiple disciplines.
